

# Bat2 Lite

Scales for automatic weighing of live poultry in halls

Bat2 Lite is a compromise, cost-effective solution from our family of automatic poultry scales. It offers most of the functions that the farmers need, while still keeping low price. The birds are weighed on a hanging plate that is hung on the hook in the scale. Thanks to its compact design and optional battery operation, the Bat2 scales can be installed very quickly without any wires.

Bat2 Lite includes the following functions:

- Precise detection algorithm shared by all Bat2 versions
- One predefined growth curve can be defined
- Statistic calculations:
  - Number of heads weighed
  - Average weight
  - Daily gain
- Archive for last 55 days of weighing
- Large graphic display
- Optional battery operation

## Specifications:

Capacity: up to 100 kg  
Memory capacity: last 55 days of weighing  
Power: from mains or from battery as an option  
Battery life: up to 15 days
